

**Coordinator
(Rank 0)**

**Intermediate
Worker (Rank i)**

**Terminal Worker
Node (Rank N)**

Benchmarking/ Hardware Profiling

1. Request compute and memory benchmark

2. Request compute and memory benchmark

3. Return hardware capabilities (TFLOPS, RAM)

4. Return hardware capabilities (TFLOPS, RAM)

Smart partitioning and Setup

5. Calculate memory-aware layer distribution

6. Dispatch assigned layer map and network config

7. Dispatch assigned layer map and network config

8. Initialize empty model skeleton, and
load assigned weights into memory

9. Initialize empty model skeleton, and
load assigned weights into memory

10. Initialize empty model skeleton, and
load assigned weights into memory

11. Acknowledge worker ready

12. Acknowledge worker ready
